

### Broadcast Camera Fiber Link Concentrator

#### SYSTEM Description

Sometimes there is not enough fibers to connect all cameras via dark fiber, Camera Multilink is the solution. Up to Five Broadcast Cameras over a Fiber Pair with **FULL FIBER REDUNDANCY** **Fiber Switch** allow a full redundancy in case of fiber fail. In case of loss of active fiber the redundant one is automatically instantaneously selected and the alarm is activated

Removable Main and Redundant power supplier are standard

Thank to FlexyBUS the fifth camera can be substituted with an Ethernet connection (or MADI, SDI,...)

Select Your preferred Fiber Connector (LC,SC,E2000, ST, Neutrik DUO, SMPTE or REM)

One 12G SDI BiDirectional (option) for general purpose are available on an independent fiber

### Broadcast Camera Fiber Link Concentrator Frame and Concept

For a quick on field trouble identification all fiber connections failure are indicated by error LEDs:

All connections to Power Adapters (5), to CCU-Shed (5) and Link Fibers (2) plus PS Status (2 - Green)

Fiber Switch can be manual forced to each fiber or leaved in Automatic mode
